A simply safer way of removing blades.

Remove, contain and dispose of blades without the unacceptable sharps injury rates of two-hand removal techniques involving fingers, forceps or re-sheathing.
A simply safer way to stay focused on your job

Qlicksmart BladeFLASK provides a simply safer way to remove and contain used scalpel blades. This world-first single-handed scalpel blade remover prevents the dangerous injuries commonly caused by removing blades with fingers, forceps or re-sheathing.

Continue to use the best tool for your job

Most practitioners prefer the balance, weight and ergonomics of a reusable steel scalpel handle but removing used blades manually compromises staff safety.

Flimsy disposable plastic scalpels are not the answer because they are harder to use, more dangerous and less cost-effective.

The BladeFLASK simple ‘push and click’ blade removal solution for steel scalpels:

- IMPROVES PATIENT SAFETY by enabling practitioners to use ergonomic precision steel scalpels
- IMPROVES STAFF SAFETY by ensuring the used scalpel blade is removed with safe single-handed technique and then safely contained until final disposal.

Minimise risks of injury and infection

Sharps injuries are a serious occupational hazard in healthcare settings. Scalpel cuts are not only more severe than needle stick injuries, they are also more likely to happen. The single-hand technique of removing blades minimizes your risk.

- 8-11% of sharps injuries are caused by scalpel blades.1,2
- There are 662 scalpel injuries per 100,000 scalpel blades used, compared to 3.2 syringe and loose needle incidences per 100,000 disposable syringes and loose needles.3 Scalpel injury rates are 200 times higher than sharps injuries involving syringes.

These alarmingly common scalpel injuries cause pain, emotional distress, potentially fatal infections, and damage to digital nerves, arteries or tendons requiring microsurgery and extensive rehabilitation. BladeFLASK dramatically reduces the risk of scalpel blade injuries in your workplace.

Make compliance a practical reality

BladeFLASK ensures optimal safety based on speed and convenience for the end-user, ergonomic simplicity and passive, automatic and single-handed safety principles. By enabling practitioners to continue to use their preferred metal scalpel handles, the wall-mounted or bench-mounted BladeFLASK improves both patient care and staff safety.

Healthcare workers in the United States alone report between 600,000 and 1 million sharps injuries per year. Many more go unreported.4 Occupational health and safety regulations worldwide are responding.

BladeFLASK meets these essential safety standards:

- OSHA Bloodborne Pathogen Standard “1910.1030”
- CE compliant

Remove and contain blades with one hand - push and click

BladeFLASK is secured by a reusable mounting bracket, which means you do not have to hold or brace the BladeFLASK when in use. The bracket enables the BladeFLASK to be positioned at point of use (wall, bench or trolley mounted), making single-hand blade removal, containment and disposal as simple as ‘push and click’.

Not just effective, it is cost effective

This essential safety solution ensures regulatory compliance, dramatically reduces injury costs, and is significantly cheaper than disposable plastic scalpels. You will save up to US$225 of disposable plastic scalpels with one BladeFLASK.

Sharps container

BladeFLASK is a puncture proof sharps container. When it is full, the BladeFLASK can be disposed safely without any further exposure to sharps contact.

It conforms with the following regulatory requirements:

- UN Transport UN3921
- British Standard BS7320:1990

Applications of BladeFLASK

BladeFLASK single-handed scalpel blade remover can be used in anywhere scalpel removal is required, including:

- Hospital departments
- General practice
- Podiatry/Chiropody
- Design Studios
- Education
- Veterinary
- Dental clinics
- Pathology laboratories
- Mortuaries
- ... and wherever scalpels are used

Auto shut-off

BladeFLASK has a built-in counter with a shut-off mechanism that activates automatically after 100 blades have been removed. There is no danger of overfilling.

Just in case it might happen

“Do you expect a car accident when you drive home tonight?”
“No”
“Then why do you wear the seat belt?”
“Just in case...”
Use a single-handed blade remover just in case...
Instructions for Use

1. Place blade flat onto landing pad - Sharp Edge Right / Tang “UP”
2. Push scalpel handle into BladeFLASK parallel to landing pad - Until pronounced CLICK
3. Remove handle - Blade contained in BladeFLASK (removes up to 100 blades)

Specifications

| Colour versions | Red - for USA
Yellow - for all other countries |
|-----------------|----------------------------------|
| Product code    | QFRGEN - red version
QFYGEN - yellow version |
| GMDD code       | 46235 |
| Blade capacity  | 100 blades - the BladeFLASK shuts off automatically when maximum capacity is reached. |
| Compatible Blades & Handles* | Handles: #3, 3L, 4, 4L, 5, 7, 9, Lawton long handle. Blades: #10, 10a, 11, 12, 13, etc. up to and including #25a, 27 and 36. |
| Incompatible Blades & Handles | Baron handle, Beaver handle, Disposable handles |
| Size (per unit) | Length 11cm, Width 9cm, Height 14cm |
| Weight (per unit) | Approximately 250g |
| Accessories     | Mounting Bracket - the bracket holds the BladeFLASK in place to allow single-handed removal of scalpel blades. |

Material | ABS (acrylonitrile butadiene styrene) |
Latex | No |
DEHP | No |
Sterile | No |
Re-useable | Multi-use - Each unit removes 100 blades before disposal |
Disposal method | The infectious substance logo on the front label and the correct sharps container colour of the unit allow it to be disposed of as medical waste. Please follow your establishment’s procedures for the disposal of medical waste. |
Regulatory approvals | Australia - Listed under TGA ARTG NO: 146821
USA - FDA 510(K) premarket approved #K983367 as a sharps container

Note: BladeFLASK is mounted on Mounting Bracket during use. BladeFLASK to be disposed of as medical waste after 100 blades inserted.
